WHY CHOOSE US ?

- 14-DAYS SHIPPING**
 Because doing your job at full capacity can't wait.
- GLOBAL PRODUCTION CAPACITY**
 With 10 manufacturing plants around the world.
- COMPLIANCE WITH INTERNATIONAL STANDARDS**
 Our products comply with all global quality standards for safety eyewear such as the EN166.
- TRUSTED BY THE BEST**
 We work with top organizations such as General Electrics, BP, Eiffage, Coca-Cola, EDF, Rolls-Royce.
- A MORE SUSTAINABLE PRODUCTION**
 We strive to develop products with greener materials and manufacturing processes for a better future for you, us, and the planet.
- CERTIFIED CONTROL**
 We retain total control over the quality and safety of the products we make. Our factories are ISO 9001 certified.
- CONSTANT INNOVATION**
 We are constantly improving our protective eyewear to provide better protection for all healthcare professionals.

THE GLOBAL PUREPLAYER IN PPE EYEWEAR AT YOUR SERVICE

PETER SMITH
CEO
BOLLÉ SAFETY

As CEO of Bollé Brands, it is a privilege for me to serve the millions of hard-working industrial workers who use Bollé Safety products every day. A privilege because I feel that we render a genuine service to the industries and families that rely on them in the form of quality eye protection.

Bollé has been a leader in the eyewear industry since 1888.

The industrial sector has been our main focus since day one: in the 1950's, Bollé Safety was founded with the ambition to protect the eyes of industrial workers from the harsh environments they work in. And we continue this legacy today with innovations like PLATINUM, our anti-fog and anti-scratch coatings, or ProBlu, the most advanced blue light filtering technology.

We are now working on our legacy for tomorrow, with sustainability as our number one priority: we are fully invested

to develop sustainable products like the KLASSEE glasses and our eco-packaging, as part of our Go Green plan.

For the past 60 years, industrial companies and workers all over the world have come to expect the highest standards of excellence when it comes to Bollé Safety products. Combined with our Comfort Sense Perception (CSP) lens filtering technology, Bollé Safety offers over +400 combinations of protection for any job, any time, anywhere.

But we didn't just become the world's most trusted protective eyewear manufacturer based on safety alone. Ask any wearer of Bollé Safety PPE and they will tell you that what makes us different from other brands is our mindset of creating products that don't just keep you safe, but also let you be great at what you do.

So this catalog doesn't just represent industrial eye protection at its best. It also represents all the men and women who wear Bollé Safety on the job working at their best as well.

So, if you already wear Bollé Safety, thank you for your loyalty. And if this is your first time with us, we are pleased to welcome you into this community of greatness.

We can't wait to See All You Can Do.

MARKINGS AND STANDARDS

BOLLÉ SAFETY LENS AND FRAME MARKING IS SPECIFIC TO EACH PRODUCT. EACH MARKING CORRESPONDS TO A VERY SPECIFIC USE. CERTIFIED AND TESTED BY INDEPENDENT LABORATORIES, THIS INFORMATION GUARANTEES PROTECTIVE EYEWEAR QUALITY AND RESISTANCE.

The guarantee of Bollé Safety product authenticity and high quality.

**UK
CA**

The UKCA (UK Conformity Assessed) marking is a new marking used for goods sold on the market in Great Britain (England, Wales and Scotland). It covers most goods which previously required the CE marking.

A NEW ISO STANDARD

In the coming years, ISO 16321 will officially replace EN166 in order to bring more safety to users. For more information on the standard and the markings, please contact our experts.

EN166: the reference standard

European PPE regulation 2016/425 makes marking CE and the logo of the company on all personal protective equipment compulsory.

The EN166 standard applies to all eye protection and guarantees adequate marking and the quality of the equipment. Its purpose is to guarantee protection from:

- Impacts characterised by varying degrees of severity
- Optical radiation
- Molten metal and hot solids
- Droplets and splashes
- Dust
- Gases
- Short-circuit electric arcs
- Or from any combination of these risks.

Standard EN166 also defines the basic characteristics to which all eye protection must conform with regard to two criteria: the optical quality and the minimum strength.

EN172: Industrial use solar filters

EN172 defines the scales and requirements of the corresponding transmission factor for solar filters for industrial use/natural light sources.

MATERIALS

POLYCARBONATE

The main feature of polycarbonate is its **high impact resistance**. An anti-scratch coating is applied automatically to make the material more scratch resistant. Polycarbonate has the added advantage of absorbing all A and B ultraviolet rays from 280 nm up to 380 nm.

CR39

This is an organic resin material which is stronger than mineral glass and **50% lighter** and which absorbs a proportion of ultra-violet rays (UVB). Its clearness guarantees perfect optical quality. Its surface scratches more easily than mineral lenses. To remedy this, an anti-scratch coating is applied to the lens.

TRIVEX®

Trivex® has the advantages of polycarbonate and of CR39. Trivex is tougher than CR39 and withstands chemicals and solvents very well, which is not the case for polycarbonate. It is also one of the **lightest materials on the market** with its density of 1.11g/cm³, providing perfect optical visioⁿ and filtering 100% of UVAs and UVBs.

	PC	CR39	Trivex
GENERAL			
EN166 Marking	F	S	F
Lightness	★★★	★★☆	★★★★
Optical Quality	★★☆	★★★★	★★★★
STRENGTH			
Scratch resistance (toughened HC coating)	★★☆	★★★★	★★★★
Shock resistance	★★★★	★★☆	★★★★
PROTECTION FROM RISKS			
Chemical risk	★★☆	★★★★	★★★★
UV risk (UV cut-off)	385 nm 100% UVA I UVB	350 nm UVB	395 nm 100% UVA I UVB

COATINGS

ANTI-SCRATCH

ALL OUR LENSES ARE SHIPPED WITH ANTI-SCRATCH COATING AS STANDARD. Scratches are one of the repetitive problems that have a major impact on visibility and which can shorten product service life. An anti-scratch coating is applied on the surface of the lens thereby making it more scratch resistant.

ANTI-REFLECTIVE

ANTI-REFLECTIVE COATING, WATER REPELLENT, ANTI-STATIC AND REINFORCED ANTI-SCRATCH Lenses without anti-glare coating result in a reduction of light transmission of 10 to 15%, thereby penalising visual quality. Anti-glare coated lenses are perfectly transparent and transmit 99% of light. The anti-glare coating improves clearness and contrast giving a more precise image. Anti-glare coating also strengthens scratch resistance. Combined with an anti-static coating, it prevents dust from sticking to the lens and also has a water-repellent property to prevent water from staying on the lens.

PLATINUM

ANTI-FOG AND ANTI-SCRATCH COATING. Contrary to other anti-fog coatings, the Platinum® coating gives permanent fog resistance **on both sides** and limits the condensation effect. It maintains its properties even after repeated cleaning. This exclusive Bollé Safety coating complies with the EN166 standard with the **K&N marking**.

B-ZEN

ANTI-GLARE COATING AGAINST BLUE LIGHT, ANTI-STATIC WATER REPELLENT AND REINFORCED ANTI-SCRATCH. The B-Zen coating was designed for people exposed to blue light through LED lighting and screens. This anti-glare, water repellent, anti-static, anti-scratch coating filters about 20% of undesirable blue light. It is very scratch resistant and easy to clean. B-Zen's anti-static properties also improve clarity and reduce dust deposits on the lens surface, making it easier to clean.

DISCOVER

TINTS AND FILTER

TINT

The intensity of the tint protects against glare by reducing the light intensity. It is available in brown or grey and in different shades. Thanks to the UV filter, Bollé Safety provides full protection against UV rays for all tints. The tints are hardened and comply with the EN172 standard.

 **DARK QUARTZ/BROWN LENS**
Solar tint for extreme conditions

 **DARK SMOKE LENS**
Solar tint for extreme conditions

MODULATOR

Photochromic glass is a glass that changes colour depending on the quantity of ultra-violets (UVs). The glass becomes lighter or darker automatically (variable comfort tint: brown or grey) depending on surrounding light levels in order to optimise users' sight and protection throughout the day. UV coating combined with photochromic glass gives optimum eye protection. Modulator has an anti-scratch coating and complies with the EN172 standard

UV400

Contrary to polycarbonate, CR39 glass does not filter all UVs. This is why the UV400 coating can be added when ordering for total ultra-violet filtering. UV400 complies with the EN172 standard

BECAUSE WE ARE THE PPE EYEWEAR SPECIALISTS

We are always going the extra mile to offer you new products that meet your specific needs or environments.

Our EXCELLENCE range expands with new KOVER, KLASSEE, KURT, B714 & B810 frames, as well as a new range of products: OFFICE, featuring timeless frames designed for optimal vision in office environments.

EMBEDDED BLUE LIGHT
FILTERING TECHNOLOGY

Introducing the most advanced blue blocker lens filtering technology on the market to prevent the vision of workers, screeners, and children from being damaged by harmful blue light

OUR EMBEDDED LENS TECHNOLOGY ALLOWS FOR THE DISPERSED PIGMENTS TO BLOCK 100% OF THE HARMFUL BLUE LIGHT UP TO 420 NM. COMBINED WITH OUR BLUE ANTI-REFLECTIVE COATING APPLIED TO THE INSIDE OF LENS, THE PROBLU TECHNOLOGY ABSORBS 82% OF THE HARMFUL BLUE LIGHT UP TO 445 NM.*

*Test report from Pourquery Laboratory

Protect yourself, your family and your employees by choosing the protective measures that suit your needs and make sure you keep it up.

BLUE LIGHT380 - 500 NM	
<div>HARMFUL BLUE LIGHT380-445 NM</div> <div>-Contributing to digital eye strain</div> <div>-Potentially damaging the retina</div> <div>-Increasing the risk of eye diseases such as age-related macular degeneration (AMD)and cataracts...</div>	<div>BENEFICIAL BLUE LIGHT445-500 NM</div> <div>-Regulating the circadian rhythm that controls the sleep-wake cycle</div> <div>-Boosting brain activity and improving memory, mood, alertness and mental performance</div>
BLOCK IT	ENHANCING ITS TRANSMISSION

Screen culture is here to stay but by adopting these simple solutions we can reduce the risks to vision as well as a host of other physical, mental and emotional disorders.

To protect yourself, your family and your employees, choose the protective measures that suit your needs and make sure you keep it up.
